

Submitter: Vyacheslav Dmytruk

On Behalf Of: Self

Committee: House Committee On Behavioral Health and Health Care

Measure: HB3223

Even in the time of need for more dental assistants in the state we should not lower the quality and the bar to achieve this. Our goal should be to get competent and qualified DAs not just get more DAs. This bill, if passed, would not improve the quality of the assistants, it will just cause dental offices to train personal who might not even realize what the job of the dental assistant entails. Certification is the way to assure that the person knows what the job is like and will save time and resources from going through interview and training of people who will not stay committed to the field of patient care.

Sincerely,

Vyacheslav A Dmytruk DMD
