

Submitter: NW Coastal Range
On Behalf Of:
Committee: House Committee On Education
Measure: HB2959
HB 2959 HOUSE COMMITTEE ON EDUCATION

The scope of duties of employment for health personal in Oregon Public School does not need changed. The state of Oregon needs to operate public schools only for learning and leave medical treatment and advice to a licensed family physician, medical facility, urgent care and/or hospitals. Citizens with minor child(ren) deserve autonomy over their family medical history, illness, or treatment. Government should not interfere with the sovereignty of citizens to privacy, both for themselves and their children. When a child in Oregon isn't expected to read until third grade is an abomination, Oregon Department of Education should focus on learning skills that will help them succeed. Oregon does not require enough hour time in-school time throughout the year. Stop indoctrinating our children to WOKE ideals of the minority of Oregonians.
