HB 3035 HOUSE COMMITTEE ON JUDICIARY

HB 3035 is unconstitutional, the accused has a right to question evidence and cross examine the accuser/reporter of the supposed crime. Making multiple overlapping laws with a stiff prison term and fine does not serve justice lawfully. What if two or more people are in collusion for revenge against another purported person that may/may not have made threats.

Written as if the accused is guilty and has to prove their innocence without due process. Law requires an injury, accuser to testify under oath, and be tried by a jury or judge.

HB 3035 deletes the steps that are required by law for a fair and impartial hearing where all participants in witness of the crime must appear in court.
