

Senate Bill 704 Universal Health Plan

I can not support “universal health care” and you should not either. I don't see much discussion about how to implement it only who will run it, their skills and length of time in office. Sounds like you have the cart before the horse.

As one now in his third year of Medicare I know what my contributions, copay and monthly costs are. I don't want to gamble on an unknown. Where in this Bill does it say we can opt out? Does it give us the option as Medicare does each year to chose our provider? Again I don't see that. Will you be forcing us into a one size fits all. Where is the freedom of choice? No I think it's a bad idea.

Respectfully Submitted
