

Submitter: Shauna McKain-Storey

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB542

I support this bill because I think people should be able to repair the often expensive cell phones and other electronics that they own, and that manufacturers shouldn't obstruct this by withholding needed information. I also think that enabling people to repair these items instead of constantly replacing them would help to keep them - and the often dangerous substances that they contain - out of Oregon landfills. We are running out of room to dispose of all of the trash that our growing population generates! Thank you
