

Submitter: Taylor Conlon

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure: HB3158

This will very much hinder people in non-urban areas where we depend so much on diesel fed equipment. It will also hurt those who are in the transportation business because the majority of transportation vehicles are diesel. This is a feel-good bill to punish hard working class Oregonians and make urbanites feel like they're making an impact on the environment. In reality, it does nothing to change the environment other than piss off the hard working individuals who do so in order to make the world go 'round.
