

Submitter: Melodie Ethel-King
On Behalf Of: New Horizons Wellness Services
Committee: Senate Committee On Finance and Revenue
Measure: SB127

As a small business that provides mental health services, this bill will help our clinic to remain viable. With the increases in expenses for all materials and staffing, the current limit does not take into account that significant expenses exist just to keep the doors of the business open. Please help us so that we can continue to help our community.
