

Submitter: Barb Morris

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB530

We cannot afford to proceed with business as usual. This bill contains practical, concrete, actionable, and totally doable steps we as Oregonians can take to mitigate the already-felt impacts of global climate change. We can do this. We need to do this. And I believe we are morally obligated to do what we can to heal the damage we've already caused and reduce the damage still coming our way. Simple as that.

Respectfully,
Barb Morris
