

Submitter: Julie Daniel

On Behalf Of:

Committee: House Committee On Education

Measure: HB3014

This is a sensible fix and worthy of a yes vote. The more students who can walk or bike to school the better. The ability to fund crossing guards, walking buses, bike trains and other innovative active transportation solutions will give schools the flexibility they need to best serve both students and the community at large. It will save schools money, help alleviate the bus driver shortage and help reduce vehicle trips. In addition, children who walk or bike do better academically, have fewer sick days and are better behaved in the classroom. I am in support of this measure.
