

**TESTIMONY REGARDING H.B. 3080**

Co-Chair McLain, Co-Chair Gorsek, and Members of the Committee:

Thank you for the opportunity to provide testimony regarding H.B. 3080, which allows for electronic transmittal of certain motor vehicle documents.

Tesla supports H.B. 3080, as it would modernize the provision of motor vehicle titling documents by relieving the requirement for those documents to be submitted exclusively in physical form. Enabling electronic document transmittal and e-sign are industry best practices which reduce both timelines and costs for motor vehicle owners, dealers, and associated government departments.

Thank you,

*Noelani Derrickson*
