

Submitter: David Manion

On Behalf Of: Manion landscaping inc

Committee: House Committee On Climate, Energy, and Environment

Measure: HB2700

I have 4 diesel tractors, 10% or \$2,500 will not be fair compensation per tractor. I am in a green industry of installing parks, wetlands, and commercial and residential landscaping projects. These proposals may shut down my business or cause extreme hardship. Few mechanics are trained or able to work on these conversions, and electric will not match the efficiency of diesel performance, much less charging in the field. My company has provided employment and supported families for 45 years. These proposed changes and restrictions simply fuel inflation and drive our cost of living up.
