

Submitter: Mark Cosby

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure: HB2215

Hello Energy Committee.

WHY NOT !

World wide Countries are going to Nuclear energy.

This is the cheapest energy and to compete in mfg. we need to keep costs down.

"Clean Energy" to be honest is not clean... Wind and solar ends up in toxic landfills.

E car battery's have relative short lives...

Lithium Batteries disturb a lot of ground...

If Hydo power is dirty..... I think we should be open to the realities of other energy sources.
