

Submitter: David Klaus

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure: HB3152

I oppose this bill and the so called "green energy" movement as it seeks to replace cheap and reliable energy sources with more expensive and less reliable "renewables." In these inflationary times, the last thing people need is added costs in utilities. The only thing "green" about this agenda is the green being sucked out of people's bank accounts and transferred to lobbyists and greedy politicians lining up to bury their faces in the public treasury trough.
