

Submitter: Charles Newlin

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure: HB2215

HB 2215 is both extraordinarily reckless and in defiance of the will of the voters, since it is intended to revoke the law they voted for.

The Northwest has long experience with nuclear power; the Columbia and the Pacific Ocean are already radioactive, thanks to Hanford and Fukushima. Trojan had to be shut down; WWPS, too. Why on earth would we try that again, or risk making the contamination even worse?

Please vote to dismiss this proposed law with contempt, as happened to previous versions.

Thank you,
Charles Newlin
