

Submitter: maurice Yoder  
On Behalf Of: Sanity  
Committee: House Committee On Rules  
Measure: HB3206

This bill is absolutely asinine. This is more of the effort to bring one party rule. It will deepen the indoctrination of our youth. The students should not be choosing the people who make the decisions about their education. We Need mature adults making those decisions. We need parents having the say in our children's educational choices. They are our children and grandchildren. This would be akin to turning over the decision making for the family household responsibilities.

There was a poll out that asked young people: at what age do you consider yourself and adult? The majority answer was 36 years of age. You are asking us to let them vote 20 years before they consider themselves adults? That is the actions of idiotic politicians wanting to guide this state further into Socialism. I did not spend my time in the military fighting for Socialism. It was spent fighting for our Constitutional Republic. Not for Democracy, Now you want my time of service to mean nothing.

How about we put God back into our education of our youth. Teach them morals. Teach them respect for others. Stop teaching them to be racists. No, you cannot legislate morality, I know. But, why are you legislating immorality?

This bill should be dead on arrival. Let's legislate wisely.
