

Submitter: Kevin Goodrich
On Behalf Of: Oregonian Families
Committee: House Committee On Rules
Measure: HB3206

Are you kidding your constituents? If minors were mentally competent to enter into legal contracts, this legislative joke (aka House Bill 3206) might be taken seriously - but they're not, so it won't be...and those who vote for this bill will be unelected by those who see through this insanity. Where are the ideas to make Oregon better, not to destroy our state from within?! How about ending this madness immediately and repairing / restoring Oregon's renewable natural-resource-based economy now so Oregonian families can have a realistic chance at achieving America's standards of mental health?! We urge you to vote 'no' on HB 3206.
