

## **I OPPOSE [SB 752]...This is such a "Dumb idea" why take the time to respond.**

The "Text of [SB 752]" states, "SECTION 1. (1) The Department of Environmental Quality shall notify the Attorney General if:...

... (a) The department determines that air quality index readings for an area of this state have reached 250 or higher during seven consecutive days; and...

...(b) The cause of the elevated air quality index readings is reasonably believed to be wildfire smoke from a wildfire that originated on lands owned by the United States...

...(2) Upon receiving notice under subsection...

...(1) of this section, the Attorney General shall investigate the cause of the wildfire. If the Attorney General determines that the wildfire was caused, in whole or in part, by forest management practices of the United States carried out in a negligent or otherwise unlawful manner, the Attorney General shall bring an appropriate civil action in the name of the State of Oregon to secure an injunction, damages or other appropriate relief...."

\*\*\*You know, this could easily "backfire" and have the Federal government file suit on Oregon should the Wildfire(s) start here.

\*It is past time for Oregon to create an ongoing partnership with the Federal government of the United States of America and not listen or smell the foul Legislative flatulents from a; seditious, whining group of crybabies in the Oregon State Legislature.

\*Our forests have been poorly managed for decades, possibly never.

\*What is needed is a modern day version of the "Civilian Conservation Corps (CCC)."

\*We need "National Service Programs" for young adults.

\*We need to dramatically and significantly cut welfare and put unemployed immigrants and citizens to work.

\*We need to rebuild our forests and watersheds.

\*We do not need Bozos trying to play junior lawyers suing our Federal Government.

Get with the program...or get the Hell out.

David S. Wall

Mr. Oregon Concur...And, I wasted precious time from my life to address this Bullsh\*t.
