

Oregon Aviation Industries

February 21, 2023

To: Oregon House Committee On Judiciary

Existing Federal Aviation Administration (FAA) aircraft and airspace regulations currently address the issues of aircraft operation and safety. Unmanned Aircraft Systems (UAS) are defined as aircraft.

Oregon land use laws already address the issues of property owner privacy. The removal of Section 1 (a) and (b) would be in conflict with existing laws.

HB2688 is redundant and in conflict with existing laws and should not be allowed to progress for a vote.

Sincerely,

Gale 'Jake' Jacobs
Executive Director
Oregon Aviation Industries
