

Submitter: Michael Gregory

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB90

Where do you think Oregon get's most of it's tax money. Most of all the sawmills , Plywood mills and all the rest of the timber industry , replant around 5 trees for every one they cut.

Oregon is not going to run out of trees, Who do you think build all the roads out in the wilderness, The timber industry that's who. Them roads are how the fire fighters get in to fight the forest fires. Maybe you all don't remember The Oxbow Fire. Maybe you should look it up. You stop the logging in Oregon and you will kill Oregon. Oregon is a timber state.
