Measure: HJR20

As thrilled as I was to turn 16, I look back and know full well I was not ready to vote. If any changes should be made to voting age, the change should be to move it back to 21. We're barely adults even then. I see this as a move that disenfranchises adults. Children are being indoctrinated in schools, and by media, (TicTok, anyone?) so it is critical to limit voting to adult citizens. DO NOT PASS HJR 20. Thank you.
