

Submitter: Sabrina Siegel

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure: HB2215

I strongly oppose HB2215

Nuclear facilities are inherently dangerous even when the best of procedures and precautions have been taken. Have we not learned anything from the multiple nuclear tragedies of our time? What of the possibilities now of power grid outages or sabotage? Without electricity for cooldown there is an instant disaster which could kill and maim inhabitants and pollute the environment for hundreds of years. This is an absolute no-brainer to know that this form of generating electricity is prohibitively much too Dangerous and risky. It would be highly irresponsible to allow this fate to befall our beautiful Oregon.
