

Submitter: Aaron Kuehn  
On Behalf Of:  
Committee: House Committee On Education  
Measure: HB3014

I am so excited to see the bike bus bill move forward with support from around the state. My child primarily rode his bike to school throughout middle school, high school, and now college because there were safe routes and because we encouraged it. Supporting active transportation choices for students helps build healthy minds, bodies, and communities. Learning how to get around in your community in a healthy way is a skill that can last a lifetime, and a skill more students want to learn.
