

Submitter: Ann DeLeon

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2697

I support safe staffing! As a nurse and a patient. When nurses are required to take on an assignment that is too heavy mistakes can happen and the patient and the nurse suffer. The nurse can not provide the excellent care she wants to provide and the patient deserves. The nurse is pulled in to many directions at once medication are given late or not at all. Patients fall as they try to get out of bed on their own. Please please institute safe staffing laws and hold hospitals accountable to the ratios established. For the life of your loved one.
