

Submitter: James MacMillan
On Behalf Of:
Committee: Senate Committee On Judiciary
Measure: SB422

I started riding a motorcycle about a year ago now. In that short amount of time it has become VERY apparent to me how dangerous it is to motorcyclists to be stuck in between cars in traffic. If you don't ride this hard to explain....lane filtering seems like it would be more dangerous to the riders and cars, but it's just the opposite. As a rider, I want to be away from cars as much as possible, and being stuck in traffic with a car in front of me and a car behind me is super dangerous. I am not in support of flying down the highway while "lane splitting" but I am in support of legal, low, safe speeds while lane filtering. It's better for everyone.
Thank you for your time.

Please support SB422
