

Submitter: David Heinzman

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB795

This bill reinstates the county to it's ownership and management of it's rightful management It was given to the state to help the efficiency of management for the counties, but in recent years the counties and it's citizens have been pushed out of any role of the decisions of their own lands to some very incompetent foresters . Some of the trees that are going past our house should not be harvested for another 20 to 30 years . These are trees that we will not have in the future . And that is beside the more important issue of jobs and revenue.
