

Submitter: Fernando Delgado
On Behalf Of:
Committee: Senate Committee On Judiciary
Measure: SB422

Think of the amount of traffic that can be reduced by letting motorcycles lane split. It's also better on overall motorcycle emissions and provides a safer place for a motorcycle rider to go than the back of a long line that has a serious possibility of causing an accident. I personally have a hard time starting out in traffic because my bike moves significantly faster than a car off the line. It is not a big bike by any means, only 300cc, but I still face issues. Please consider passing this to make a safer, more green environment for motorcycle riders.
