

Submitter: Paul Stafford
On Behalf Of:
Committee: Senate Committee On Judiciary
Measure: SB422

September of 2022 I was rear ended while traveling at a stoplight in Hoodriver I was third in line at the light , I was lucky and there was minor damage, my brother in law was rear ended at a stoplight a few years before and he and his pillon rider were both severely injured.

If this “no brainer “ law was passed there would be a reduction in both physical injury and property damage, this makes zero sense to me as a rider and a citizen of Oregon why we would not push for this to pass , it seems to be very simple , it’s safer to allow it as we can see in the state to our south , even the police officers who respond to accidents support it .. let’s get this done !!
