

Submitter: Alessandro Carrara
On Behalf Of:
Committee: Senate Committee On Judiciary
Measure: SB422

I am a motorcyclist and support passing bill SB422.

Motorcycles greatly reduce congestion and emissions. Many corporate offices categorize motorcycles as an alternative transportation method and provide incentives for employees who choose to commute on motorcycles. Hence, motorcycles are not merely a recreational vehicle and a special interest mode of transport.

Studies have shown that, over time, the benefits of lane filtering under certain conditions leads to:

1. Increased rider safety
2. Decreased traffic congestion
3. Decreased traffic emissions

Thank you.
