

Submitter: DAVID LARECY

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB795

Our state is rich in Natural Resources that are poorly managed. Please give local counties the ability to manage these resources at a local level to benefit the communities that are near these resources. Our Counties have the ability and the determination to manage the forests locally for generations to come. Those of us that live near this forest land respect them and their environments.
