

Submitter: John Wehn

On Behalf Of:

Committee: Senate Committee On Judiciary

Measure: SB422

Allowing motorcycles to travel between lanes of traffic under certain conditions helps alleviate congestion, increases the safety of motorcycle operators (because they do not need to be the last vehicle in a line of stopped traffic), and may serve to encourage greater ridership on vehicles that take up less space on roadways and in parking lots and use less fuel (and pollute less) than single-driver four-wheeled vehicles.
