

Submitter: Brandon Woods

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2697

While OFNHP only encompasses pharmacy technicians, that doesn't mean staffing issues are not occurring here. Leadership has become much more picky about offering incentive shifts; and when staffing has been as lean as it has been, it has caused days where work doesn't get completed. When work doesn't get completed, caregivers get stressed, causing a higher capacity for error. With safe staffing safeguards, this would be much less of an issue for our hospital pharmacy.
