

2/16/2022 Oregon Senators Alert

-- Sent from **Chelsea Simpson** to **Senator Akasha Lawrence Spence** on Feb 16, 2022 --

Dear [@legislatorTitle] [@legislatorLast],

As your constituent and Oregonian who cares deeply about those struggling to build their family in our state, I strongly urge you to support the infertility insurance bill, SB 1530, which will help Oregonians build their families when faced with cancer or other conditions that can cause infertility. Oregon families need your support now.

My Husband and I have spent the last two years trying to get pregnant. None of the health insurance plans offered through our employers cover infertility, and the closest thing to infertility coverage that my insurance company, Regence Blue Cross Blue Shield of Oregon, offers is a 1% discount off of the purchase price of a treatment package through a company that doesn't even have providers in the state of Oregon, so even if I did want to use the 1% discount I would have to travel out of the state of Oregon to use that "benefit". I've searched for any insurance companies that offer the coverage on an individual plan and have discovered that none do, the ONLY way to get this coverage in the state of Oregon is if you happen to be lucky enough to get coverage through your employer.

I need your support, along with the 1 in 8 couples in our state living with the disease of infertility and the thousands of Oregonians diagnosed with cancer during their reproductive years.

It is time for Oregon to update its insurance laws to include coverage for the standard of care for patients with infertility and those diagnosed with cancer or other conditions that may cause infertility. By passing this pro-family legislation, Oregon will join 19 other states across the nation that help hardworking families get access to medically necessary treatments while only minimally impacting insurance premiums, if at all. States with IVF insurance have lower rates of multiple births than states without IVF coverage, and lowering multiple births decreases overall health care costs and results in healthier babies and healthier moms.

Please support Oregon families by moving this pro-family bill forward. Thank you!

Regards,
Chelsea Simpson

Dear [@legislatorTitle] [@legislatorLast],

I am a high school teacher in Southern Oregon who has dedicated my life to helping children. My husband and I have now struggled for the last three years to have a child of our own. I have been diagnosed with infertility, which is a disease, though insurers do not rightly recognize it as such. Though I have decent insurance through my school district, my insurer has covered none of the costs related to trying to start a family, including: diagnostic tests and treatments for polycystic ovary syndrome (a hormonal disorder which causes health issues not just relating to infertility), diagnostic tests and treatments for insulin resistance (which can cause diabetes as well as affect fertility), and diagnostic tests and multiple surgeries to remove uterine polyps (which can cause cancer but also affect fertility). We have paid over \$50,000 out of pocket the last three years for: countless blood draws, tests, pregnancy tests, semen analyses, diagnostic procedures including multiple hysteroscopies, a hysterosalpingogram, and polypectomies, ovulation induction medications, intrauterine inseminations, IVF medications, two IVF egg retrievals, genetic testing of embryos, two IVF embryo transfers, one second-trimester stillbirth hospital bill, and costs related to an early miscarriage. We have also spent what amounts to over five weeks of sick leave each in the last two years to travel to Eugene, OR, for appointments with our reproductive endocrinologist.

We are productive, active and honorable members of our Oregon society. And yet, we cannot have a child without medical intervention. We have suffered two losses in the last six months on this journey, including one late second trimester stillbirth, and still we move forward in the hopes of becoming parents and attaining this goal that we've worked so hard for. It feels unfair that the insurance companies we pay thousands of dollars to every year just for coverage have denied all of our expenses for anything remotely related to infertility, even the diagnostic tests that show I have legitimate medical issues, simply because those issues also happen to cause infertility.

As your constituent and Oregonian who cares deeply about those struggling to build their family in our state, I strongly urge you to support the infertility insurance bill, SB 1530, which will help Oregonians build their families when faced with cancer or other conditions that can cause infertility. Oregon families need your support now.

I need your support, along with the 1 in 8 couples in our state living with the disease of infertility and the thousands of Oregonians diagnosed with cancer during their reproductive years.

It is time for Oregon to update its insurance laws to include coverage for the standard of care for patients with infertility and those diagnosed with cancer or other conditions that may cause infertility. By passing this pro-family legislation, Oregon will join 19 other

states across the nation that help hardworking families get access to medically necessary treatments while only minimally impacting insurance premiums, if at all. States with IVF insurance have lower rates of multiple births than states without IVF coverage, and lowering multiple births decreases overall health care costs and results in healthier babies and healthier moms.

Dear [@legislatorTitle] [@legislatorLast],

Your support is clear - thank you so very much. Just keeping up our campaign to pressure lawmakers into understanding the level of disappointment this community has over the decision to not progress this issue this session... 1 in 8 Oregonians have again been left without equitable access to care. :(

As your constituent and Oregonian who cares deeply about those struggling to build their family in our state, I strongly urge you to support the infertility insurance bill, SB 1530, which will help Oregonians build their families when faced with cancer or other conditions that can cause infertility. I need your support, along with the 1 in 8 couples in our state living with the disease of infertility and the thousands of Oregonians diagnosed with cancer during their reproductive years.

It is time for Oregon to update its insurance laws to include coverage for the standard of care for patients with infertility and those diagnosed with cancer or other conditions that may cause infertility. By passing this pro-family legislation, Oregon will join 19 other states across the nation that help hardworking families get access to medically necessary treatments while only minimally impacting insurance premiums, if at all. States with IVF insurance have lower rates of multiple births than states without IVF coverage, and lowering multiple births decreases overall health care costs and results in healthier babies and healthier moms.

Please support Oregon families by moving this pro-family bill forward. Thank you!

2022 Oregon Senators Alert

-- Sent from **Crystal Turner** to **Senator Kate Lieber** on Feb 13, 2022 --

Dear [@legislatorTitle] [@legislatorLast],

As an Oregonian, healthcare provider, and woman personally struggling with infertility, I strongly urge you to support the infertility insurance bill, SB 1530, which will help Oregonians build their families when faced with cancer or other conditions that can cause infertility.

The time is now to recognize infertility as a disease, and provide adequate insurance coverage for the diagnosis and treatment associated with this devastating medical condition. Infertility is not a choice, yet the workup and treatment are considered "elective" and not covered by insurance, the time is now to break this cycle.

As a Physician Assistant working in Oregon I am familiar with the other associated medical conditions that accompany many infertility diagnoses. Did you know patients with polycystic ovarian syndrome are at 13x higher risk for diabetes, including gestational diabetes? Why is the workup for this diagnosis not covered? Also, many patients with endometriosis have complex pain syndromes, needing access to surgical procedures and appropriate medications to control the disease. Lastly, patients with an infertility diagnosis often have depression at equivalent levels to those with cancer. Action is needed to recognize these conditions as a disease and provide coverage as such. Many of the non-covered treatments that assist with conception can also co-address these other medical conditions. Fertility treatment is more than building a family - it can be restoring normal hormone function to the body or stopping the progression of painful scar tissue. The quality of life impact of receiving treatment for infertility is immeasurable.

Infertility has had a deep negative impact on my life personally. My husband and I have spent over 6 years trying to start a family. We have exhausted our savings on the workup/treatment of unexplained infertility. We have paid out-of-pocket for office visits in a fertility clinic, labs, imaging, procedures, expensive medications, and various treatments (IUI and IVF). Our current policy in Oregon considers these measures elective, and insurance denies coverage. We didn't choose this, it is not elective. I would love to be able to conceive in a traditional fashion, but unfortunately it is not possible and I need access to fertility treatment. We have spent over \$30k in just the last 2 years alone and cannot afford another IVF egg retrieval. I have just a few remaining years of possible reproduction potential and I am limited because I cannot afford to pay 100% out-of-pocket. Lack of insurance coverage is the barrier to my chance at a future family.

I am not alone in this fight. One in 8 women in our state are living with the disease of infertility. This is the same rate as women diagnosed with breast cancer in Oregon. Infertility is common, but yet ignored. Given reproduction has a definitive window (set number of years), we can no longer delay change in policy. At current time, only those

with financial means can access these important treatments. We are excluding many minority and lower income people in the process. The opportunity at a chance to have a family is be a basic right.

Oregon's insurance laws are out-of-date. I am asking you to support including insurance coverage as a standard of care for patients with infertility and those diagnosed with cancer or other conditions that may cause infertility. By passing this pro-family legislation, Oregon will join 19 other states across the nation that help hardworking families get access to medically necessary treatments while only minimally impacting insurance premiums, if at all. States with IVF insurance have lower rates of multiple births than states without IVF coverage, and lowering multiple births decreases overall health care costs and results in healthier babies and healthier moms.

Please support Oregon families by moving this pro-family bill forward. Thank you!

Sincerely,
Crystal Turner

Portland, OR 97223

Dear [@legislatorTitle] [@legislatorLast],

As your constituent and Oregonian who cares deeply about those struggling to build their family in our state, I strongly urge you to support the infertility insurance bill, SB 1530, which will help Oregonians build their families when faced with cancer or other conditions that can cause infertility. Oregon families need your support now.

I need your support, along with the 1 in 8 couples in our state living with the disease of infertility and the thousands of Oregonians diagnosed with cancer during their reproductive years.

Dear Com

Dear sen. Fred Girod,

As an Oregon resident who cares deeply about those struggling to build their family in our state, I strongly urge you to pass the infertility insurance bill before you, which will help Oregonians build their families when faced with cancer or other conditions that can cause infertility. Oregon families need your support now.

I need your support, along with the 1 in 8 couples in our state living with the disease of infertility and the thousands of Oregonians diagnosed with cancer during their reproductive years.

My daughter and son in law have been trying to have a family for many years. They have been going through fertility treatment for over 3 of those years. They have gone through all their savings and depleted all their financial means to further the medical help they need. It breaks my heart to see them go through all the pain and heart ache. Wanting a child so bad and not being able to further your treatment is so frustrating and heart breaking not only for the ones who are trying but also for their families. I believe this bill will help so many Oregonians including my child.

It is time for Oregon to update its insurance laws to include coverage for the standard of care for patients with infertility and those diagnosed with cancer or other conditions that may cause infertility. By passing this pro-family legislation, Oregon will join 19 other states across the nation that help hardworking families get access to medically necessary treatments while only minimally impacting insurance premiums, if at all. States with IVF insurance have lower rates of multiple births than states without IVF coverage, and lowering multiple births decreases overall health care costs and results in healthier babies and healthier moms.

Please support Oregon families by moving this pro-family bill forward. Thank you!

Sincerely, Barbara orr

Dear [@legislatorTitle] [@legislatorLast],

As your constituent and Oregonian who cares deeply about those struggling to build their family in our state, I strongly urge you to support the infertility insurance bill, SB 1530, which will help Oregonians build their families when faced with cancer or other conditions that can cause infertility. Oregon families need your support now.

I need your support, along with the 1 in 8 couples in our state living with infertility.

I am a clinical social worker and have worked with young children and families my entire career. Having a planned family has been important to me; in my work everyone asks if I have kids and I have always answered "someday." Now I have additional stressors of the anxiety that roots itself in the question of whether I will ever have a child of my own.

Our insurance has zero coverage for infertility. The cost of infertility treatment is prohibitive in this state for those who have put a lot of thought into growing their family. (For anyone suggesting adoption, that is also phenomenally expensive. I work with adopted children and the cost of adoption doesn't include the time and financial aspects of countless medical and mental health appointments for children who have experienced trauma.)

Please support Oregon families by moving this pro-family bill forward. Thank you!

Sincerely,

Michelle Harvey

-- Sent from **Cheryl Bledsoe** to **Senator Janeen Sollman** on Feb 11, 2022 --

Dear [@legislatorTitle] [@legislatorLast],

We are extremely lucky to have had some coverage for IVF through my husband's job. We are still going to have to pay out of pocket, since the coverage we have is not enough. Infertility has been the most grueling, traumatic struggle of my life, and adding extreme financial hardship on the top is beyond cruel.

As your constituent and Oregonian who cares deeply about those struggling to build their family in our state, I strongly urge you to support the infertility insurance bill, SB 1530, which will help Oregonians build their families when faced with cancer or other conditions that can cause infertility. Oregon families need your support now.

Dear [@legislatorTitle] [@legislatorLast],

As a friend of someone going through this right now, I have seen first hand the suffering of wanting children but having problems affording the process for in vitro. I also suffer from endometriosis, as do 1 in 8 women. For most of us, this means difficulty with maintaining a pregnancy. I have chosen to not have children at this time. But if I ever want them I would be unable to afford the process. As your constituent and Oregonian who cares deeply about those struggling to build their family in our state, I strongly urge you to support the infertility insurance bill, SB 1530, which will help Oregonians build their families when faced with cancer or other conditions that can cause infertility. Oregon families need your support now.

I need your support, along with the 1 in 8 couples in our state living with the disease of infertility and the thousands of Oregonians diagnosed with cancer during their reproductive years.

It is time for Oregon to update its insurance laws to include coverage for the standard of care for patients with infertility and those diagnosed with cancer or other conditions that may cause infertility. By passing this pro-family legislation, Oregon will join 19 other states across the nation that help hardworking families get access to medically necessary treatments while only minimally impacting insurance premiums, if at all. States with IVF insurance have lower rates of multiple births than states without IVF coverage, and lowering multiple births decreases overall health care costs and results in healthier babies and healthier moms.

Please support Oregon families by moving this pro-family bill forward. Thank you!

Sincerely,

Kathryn Glaspey

Dear [@legislatorTitle] [@legislatorLast],

As your constituent, I am writing to ask you to help get SB 1530 passed this short session. My partner and I have been dealing with infertility for years now, trying to have just one child. We are fortunate in that I have fairly generous fertility coverage from my employer and that we can afford the out-of-pocket expenses not covered by insurance. I can only imagine how difficult it must be for those who do not have insurance coverage for these treatments. Speaking specifically about IVF, even without the financial strain, the whole ordeal is stressful and agonizing -- frequent visits to clinics, the daily shots, the agonizing waits for test results, the invasive surgical procedures, the high likelihood of failure, and the prospect of never being able to have a biological child. Having had this experience, I strongly urge you to support SB 1530, so that Oregon can join 19 other states and numerous countries around the world in supporting folks who are trying to build a family and experience what many consider a quintessential part of life.

Sincerely,

Eugenia Tam

Dear [@legislatorTitle] [@legislatorLast],

My husband and I have suffered from infertility for the past three years. In that time, we have spent over \$50,000 out of pocket to diagnose and treat our infertility, including multiple surgeries, two rounds of IVF egg retrievals, two IVF embryo transfers, and all of this has resulted in one stillbirth and one miscarriage, both of which were pregnancies that we only achieved through IVF. We continue to face outrageous costs as we struggle to grow our family. It seems wildly unfair to me that families who want just one child but have infertility have to pay so much for something that others get for free.

As your constituent and Oregonian who cares deeply about those struggling to build their family in our state, I strongly urge you to support the infertility insurance bill, SB 1530, which will help Oregonians build their families when faced with cancer or other conditions that can cause infertility. Oregon families need your support now.

Not only would this give those like my husband and myself struggling with infertility the opportunity to seek medical treatments that otherwise may not be an option due to the high cost but would also allow those diagnosed with cancer in their reproductive years access to affordable fertility preservation.

Today 1:8 struggle with infertility. My husband and I have been together for 14 years. We have been enduring 11 years of infertility and have been seeking help via a reproductive endocrinologist for 3 very long and painful years. Infertility has been the hardest thing we've experienced. Undergoing test after test with disappointment month after month. IVF is the option we were given if we wanted to try to have the best chance at having a family. IVF cost about \$19k per round. Due to the high cost, we are limited on what treatments we can do and how quickly we can do them. With infertility time is very important, so we were left with a choice. Do we give up our dream of ever having a family of our own or do we try to sell everything we have worked so hard for just to try and afford to further our treatments?

Credit cards, savings, family and friends and still questioning where to get the rest of the money to keep going. Infertility affects both men and women and is defined as a disease of the reproductive system. Defined as the failure to achieve a clinical pregnancy after 12 months or more of regular, unprotected sexual intercourse. Knowing this and knowing it is something you did not cause and have no control of is hard in itself, but it makes it that much worse when money may be the only thing holding you back. My husband and I both work. My husband works overtime ever single week doing a very physical job rotating (2) 12-hour day shifts to (2) 12-hour night shifts and the cost of treatments for some of the things we need are still too expensive. So once again we are left with a choice, do we give up on our dream? Do we wait and continue to save up? I am 33 years old and a women's egg quality is said to decline after the age of 35. So, time is very important not just for us but others as well experiencing the misfortune of infertility.

We may not have an unlimited amount of money, but we do have an unlimited amount of love to give. I would love to see this bill move forward so we and other Oregonians like us can have the access to the health care we need and a chance to build the family

of our dreams.

Please support Oregon families by moving this pro-family bill forward. I strongly believe this is a service all Oregonians should have access to.

Dear [@legislatorTitle] [@legislatorLast],

SB 1530 is a critically needed change in Oregon. We are behind the curve in addressing coverage of the disease of infertility.

The call to stall this legislation in an effort to study it is unproductive. The real world data already shows that this is extremely low cost overall to insurance companies and cost savings when there are healthier outcomes for babies and moms that don't have to make risky choices when paying out of pocket (if they EVEN can afford to) for fertility care. As a coalition that has been at the front of this battle, we will continue to fight to include those on OHP and agree wholeheartedly on equitable access to care for ALL.

I've been impacted by this for 10 years, and the pain of dealing with this disease is unbearable, emotionally, physically, and financially. Having to also figure out how to fund treatment for a disease, is simply wrong.

Please support Oregon families by moving this pro-family bill forward.

Senator Beyer, we are so incredibly grateful for your support of this effort. THANK YOU.

As someone who personally deals with infertility, I am asking you to support this legislation. IVF is an enormous emotional and physical burden to endure. It should not also be an enormous financial burden on top of this. My husband and I have had to refinance our home and use money that should be for our retirement just for the opportunity to have a child. We have excellent medical insurance and an infertility diagnosis from medical professionals. The fact that insurance covers exactly zero of the necessary medical diagnosis and treatment for infertility is hurtful and confusing, on top of the burden of not yet having the children we desire so much.

Please support this bill so that Oregonians can rightfully have access to the medical care needed to build their family.

Sincerely,

It is time for Oregon to update its insurance laws to include coverage for the standard of care for patients with infertility and those diagnosed with cancer or other conditions that may cause infertility. By passing this pro-family legislation, Oregon will join 19 other states across the nation that help hardworking families get access to medically necessary treatments while only minimally impacting insurance premiums, if at all. States with IVF insurance have lower rates of multiple births than states without IVF coverage, and lowering multiple births decreases overall health care costs and results in healthier babies and healthier moms.

A little about our story;

My husband and I have been through multiple miscarriages. It is NUMBING knowing that every effort we have the option to make is extremely expensive. Losing a baby is hard enough, It leaves you with never ending grief, the feeling of incapability and the feeling of being lost, it is crippling to the couples that are trying so hard to just have the ability to welcome someone created of themselves into their lives. After spending hundreds to thousands on the ability to conceive that baby alone is hard enough, but paying up to 15000 to 20000 per cycle out of pocket, is cruelty. We're left with the option to either just quit trying and watching all of the other families conceive easily, flaunt about it, we watch drug addicts and teenagers get pregnant with just one cycle. But us, the ones who spend thousands of dollars, the ones that have to sit every month and stare at a negative test, or an ultrasound photo of a baby that couldn't make it past the first month, the ones that are mourning and have no way of relief because all we can expect is more testing, our pockets to be drained, and the feeling of being alone. I know you might be thinking, this is a little dramatic, but I have gone through so much, along with the thousands of women and couples who have faced this feeling of grief and incapability. I've lost one of my babies in my bathroom at home, in the hospital and have had to lie awake in a medical office while having an excruciating d&c done while my husband was thousands of miles away in fort benning, with no contact. I've spent thousands of dollars and the amount of stress that comes from the financial burden of this process, only causes more grief, pain and feeling of self hate.

There are no stable financial aid programs, no insurance coverage, no "help" for the families that do EVERYTHING for a baby, but all the help for those who are incapable of a stable environment. We're begging, pleading, please give us the ability to welcome a

beautiful baby into our empty nursery. If anyone feels differently and doesn't believe coverage is necessary, look on Facebook, anywhere really and look up the trying to conceive, infertility, infertility loss awareness groups and see just how many people are grieving. Speak to the fertility center of Oregon and ask for Dr Douglas Austin, he is the specialist that nearly everyone women sees for infertility and loss. He sees the bills we pay, the months we can't do anything because we can't afford out of pocket, he sees the lack in fertility assistance programs, and he sees families that are capable, determined and families that continuing to be hopeful, just so they can welcome a baby into their home. This insurance coverage will give the women the ability to be hopeful, to feel powerful, to feel like they can. It could take some of the grief and hopelessness away, it could change the way thousands of women and couples see the senate. We all need help. We're all begging. For just some slim piece of hope. Someone to help put our state on the right track. The senate is being given this opportunity and it will be highly looked up upon. Please don't forget what this means to us.

Please support Oregon families by moving this pro-family bill forward. Thank you!

-- Sent from **Ruby Graven** to **Senator Kayse Jama** on Feb 13, 2022 --

Dear [@legislatorTitle] [@legislatorLast],

Tomorrow is valentines and I'm thinking of how great it would be to have a family with the love of my life. I married my high school sweetheart about 10 years ago. I've known him since I was 16. Having a family would be a dream come true for us. I'm sure many other Oregonians share the same dream to have a child with the love of their life someday.

My husband and I have been impacted by infertility. We were diagnosed in 2017. It's been really hard to go to baby showers and have people ask me why we haven't "gotten to it already" little do people know and understand how difficult it really is for people to get pregnant. There are a lot of things that have to happen at the right time for a pregnancy. It's been hard to explain to my parents, both born in Mexico, both speak Spanish only. It's been hard to explain why we are childless, to tell them my body needs the assistance of the medical system and I need a team of people to assist. Finding the words and making this issue culturally understandable requires storytelling and creativity...sometimes pictures to explain the science involved. It's even hard to tell people that most insurance companies in Oregon don't cover fertility benefits for people diagnosed with this disease. Did you know communities of color continue to have higher rates of infertility and lower rates of accessing fertility care than white community members?

The stigma runs heavy in my family and social circle although people are starting to make less statements and ask more questions. Truly listening requires less talking and more sitting still to understand. The stigma and insensitivities are emotionally painful. Being told that "maybe it's part of destiny." Personally, I think fate is what happens, and destiny is what we do with it. Being told to "just relax" and "don't fret -it will work out." Think about how many people have become pregnant during times of famine and war, not relaxing isn't the primary problem here. We need to accept as a society that people need an evidence based proven medical team and fertility experts to assist in some cases. People want the right care offered and insurance companies are doing a better job of that in other states and countries. Oregon is behind and Oregon needs to catch up and show up.

For my husband and I and after several years we finally can get IVF treatment because my employer added it to our benefits in 2022. For the very first time, we have hope! Based on my lab work with my IVF benefits, we recently found out that it is possible for us to build our family with IVF. After starting IVF in January, we have 2 healthy viable embryos. We will be doing our first embryo transfer in the Spring of 2023. My IVF treatment so far cost my insurance company less than all the previous less successful treatments combined with the mental health treatment, holistic care we went thru in previous years.

Going thru these treatments can be hard for many. Simply being diagnosed with

infertility is stressful, emotional and traumatic for an individual or couple. This diagnosis impacts an entire extended family unit, not just 1 person. This disease impacts potential grandparents, aunts and "family". Please know that not everyone will choose to go thru the IVF process simply because they identify as a person of childbearing age. Some insurance companies will assume this and tell you this. Let me tell you as a person with true lived experience, I know several individuals in my social circle who chose not to move forward with IVF treatments for various reasons. Some may decide to opt out because of all the energy that goes into it, the stigma, health anxiety, injections, pressure on relationships, time off from work, and lack of support. That said, if you were diagnosed with a disease wouldn't you want to choose how you treat it? Especially when your doctor tells you there's hope and a proven treatment. Would you want that option? Not having this option just further stigmatizes infertility, contributes to grief, stress, loss of productivity and thus our economy and community health. You have the power to give people hope, you have the power to give people the opportunity to take charge of their health. Communities of color and LGBTQIA2+ community members, and other often overlooked people- need these benefits too. Communities have been telling you this for years. Are you listening, really listening? This decision should be a community led decision and you can be part of that.

Wouldn't it be great for Oregon to be a place where anyone can have a child when they want to? What is Oregon willing to do to truly eliminate these health disparities and how will you contribute to this mission?

I strongly urge you to support the infertility insurance bill, SB 1530, which will help Oregonians build their families when faced with cancer or other conditions that can cause infertility. Oregon families need your support now.

Please support Oregon families by moving this pro-family bill forward. Thank you!

Dear [@legislatorTitle] [@legislatorLast],

As your constituent and Oregonian who cares deeply about those struggling to build their family in our state, I strongly urge you to support the infertility insurance bill, SB 1530, which will help Oregonians build their families when faced with cancer or other conditions that can cause infertility. Oregon families need your support now.

I need your support, along with the 1 in 8 couples in our state living with the disease of infertility and the thousands of Oregonians diagnosed with cancer during their reproductive years.

My name is Troy and I'm 35 years old and I'm emailing you today in regards to my support of senate bill 1530 and reasons why I think it would be beneficial for my family and all Oregonians to receive coverage for fertility treatment. I'm married to a beautiful, strong woman named Amanda who is 33 and with whom I've been together for 14 years and married for the last 6 years. We've been trying for the last 11 years to have a family of our own and have endured many hardships and disappointments. For the last 3 years, my wife and I have been seeking fertility treatment with the help of a reproductive endocrinologist and I have witnessed first hand how hard this has been for her. The sacrifices she has made and the embarrassment and discomfort she has endured all to try to give us a family. This process has not been easy for her or I and we had hoped and prayed for positive results and went through all the steps to be told IVF is the next step for us. My wife and I pray constantly that we will be fortunate enough to have a family to give all the love in our hearts.

During this process we've encountered many obstacles and roadblocks as many other Oregonians may have as well and I feel it is wrong to deny coverage and to scrutinize Oregonians and my family alike based on medical needs pertaining to infertility. This issue deserves coverage as does anything else covered by insurance policies and families like mine who need coverage and are not being treated equally and are being discriminated against based on our medical needs. I support senate bill 1530 and believe it would be beneficial to all Oregonians who are faced with infertility issues and in need of fair medical coverage as this bill could help provide relief and support for my family and Oregonians as a whole.

I strongly support senate bill 1530 and hope this bill can be passed to insure all Oregonians receive equal coverage and give hope to Oregonians who are faced with infertility to provide relief for those struggling with this issue emotionally and financially. Please vote yes and help families like ours and all Oregonians alike struggling with this issue

It is time for Oregon to update its insurance laws to include coverage for the standard of care for patients with infertility and those diagnosed with cancer or other conditions that may cause infertility. By passing this pro-family legislation, Oregon will join 19 other

states across the nation that help hardworking families get access to medically necessary treatments while only minimally impacting insurance premiums, if at all. States with IVF insurance have lower rates of multiple births than states without IVF coverage, and lowering multiple births decreases overall health care costs and results in healthier babies and healthier moms.

Please support Oregon families by moving this pro-family bill forward. Thank you!

Sincerely,

troy hurner

It is time for Oregon to update its insurance laws to include coverage for the standard of care for patients with infertility and those diagnosed with cancer or other conditions that may cause infertility. By passing this pro-family legislation, Oregon will join 19 other states across the nation that help hardworking families get access to medically necessary treatments while only minimally impacting insurance premiums, if at all. States with IVF insurance have lower rates of multiple births than states without IVF coverage, and lowering multiple births decreases overall health care costs and results in healthier babies and healthier moms.

Please support Oregon families by moving this pro-family bill forward. Thank you!

Sincerely,

Jody McCurry

Dear [@legislatorTitle] [@legislatorLast],

As your constituent and Oregonian who cares deeply about those struggling to build their family in our state, I strongly urge you to support the infertility insurance bill, SB 1530, which will help Oregonians build their families when faced with cancer or other conditions that can cause infertility. Oregon families need your support now.

I need your support, along with the 1 in 8 couples in our state living with the disease of infertility and the thousands of Oregonians diagnosed with cancer during their reproductive years.

Dear [@legislatorTitle] [@legislatorLast],

As your constituent and Oregonian who cares deeply about those struggling to build their family in our state, I strongly urge you to support the infertility insurance bill, SB 1530, which will help Oregonians build their families when faced with cancer or other conditions that can cause infertility. Oregon families need your support now.

I need your support, along with the 1 in 8 couples in our state living with the disease of infertility and the thousands of Oregonians diagnosed with cancer during their reproductive years.

It is time for Oregon to update its insurance laws to include coverage for the standard of care for patients with infertility and those diagnosed with cancer or other conditions that may cause infertility. By passing this pro-family legislation, Oregon will join 19 other states across the nation that help hardworking families get access to medically necessary treatments while only minimally impacting insurance premiums, if at all. States with IVF insurance have lower rates of multiple births than states without IVF coverage, and lowering multiple births decreases overall health care costs and results in healthier babies and healthier moms.

Please support Oregon families by moving this pro-family bill forward. Thank you!

Sincerely,

Megan Stauffer

By passing this pro-family legislation, Oregon will join 19 other states across the nation that help hardworking families get access to medically necessary treatments while only minimally impacting insurance premiums, if at all. States with IVF insurance have lower rates of multiple births than states without IVF coverage, and lowering multiple births decreases overall health care costs and results in healthier babies and healthier moms.

Please support Oregon families by moving this pro-family bill forward. Thank you!

Dear [@legislatorTitle] [@legislatorLast],

As your constituent and Oregonian who cares deeply about those struggling to build their family in our state, I strongly urge you to support the infertility insurance bill, SB 1530, which will help Oregonians build their families when faced with cancer or other conditions that can cause infertility. Oregon families need your support now.

I need your support, along with the 1 in 8 couples in our state living with the disease of infertility and the thousands of Oregonians diagnosed with cancer during their reproductive years.

It is time for Oregon to update its insurance laws to include coverage for the standard of care for patients with infertility and those diagnosed with cancer or other conditions that may cause infertility. By passing this pro-family legislation, Oregon will join 19 other states across the nation that help hardworking families get access to medically necessary treatments while only minimally impacting insurance premiums, if at all. States with IVF insurance have lower rates of multiple births than states without IVF coverage, and lowering multiple births decreases overall health care costs and results in healthier babies and healthier moms.

Please support Oregon families by moving this pro-family bill forward. Thank you!

As your constituent and Oregonian who cares deeply about those struggling to build their family in our state, I strongly urge you to support the infertility insurance bill, SB 1530, which will help Oregonians build their families when faced with cancer or other conditions that can cause infertility. Oregon families need your support now.

I need your support, along with the 1 in 8 couples in our state living with the disease of infertility and the thousands of Oregonians diagnosed with cancer during their reproductive years.

It is time for Oregon to update its insurance laws to include coverage for the standard of care for patients with infertility and those diagnosed with cancer or other conditions that may cause infertility. By passing this pro-family legislation, Oregon will join 19 other states across the nation that help hardworking families get access to medically necessary treatments while only minimally impacting insurance premiums, if at all. States with IVF insurance have lower rates of multiple births than states without IVF coverage, and lowering multiple births decreases overall health care costs and results in healthier babies and healthier moms.

Please support Oregon families by moving this pro-family bill forward. Thank you!

Sincerely,
Maile Hutterer
2293 Birch Ln
Eugene, OR 97403

Dear [@legislatorTitle] [@legislatorLast],

As your constituent and Oregonian who cares deeply about those struggling to build their family in our state, I strongly urge you to support the infertility insurance bill, SB 1530, which will help Oregonians build their families when faced with cancer or other conditions that can cause infertility. Oregon families need your support now.

I need your support, along with the 1 in 8 couples in our state living with the disease of infertility and the thousands of Oregonians diagnosed with cancer during their reproductive years.

It is time for Oregon to update its insurance laws to include coverage for the standard of care for patients with infertility and those diagnosed with cancer or other conditions that may cause infertility. By passing this pro-family legislation, Oregon will join 19 other states across the nation that help hardworking families get access to medically necessary treatments while only minimally impacting insurance premiums, if at all. States with IVF insurance have lower rates of multiple births than states without IVF coverage, and lowering multiple births decreases overall health care costs and results in healthier babies and healthier moms.

Please support Oregon families by moving this pro-family bill forward. Thank you!

Sincerely,
Matt Zullo

Oregon families need your support now.

I need your support, along with the 1 in 8 couples in our state living with the disease of infertility and the thousands of Oregonians diagnosed with cancer during their reproductive years.

It is time for Oregon to update its insurance laws to include coverage for the standard of care for patients with infertility and those diagnosed with cancer or other conditions that may cause infertility. By passing this pro-family legislation, Oregon will join 19 other states across the nation that help hardworking families get access to medically necessary treatments while only minimally impacting insurance premiums, if at all. States with IVF insurance have lower rates of multiple births than states without IVF coverage, and lowering multiple births decreases overall health care costs and results in healthier babies and healthier moms.

Please support Oregon families by moving this pro-family bill forward. Thank you!

Sincerely,
Derek Jennings

Dear [@legislatorTitle] [@legislatorLast],

As your constituent and Oregonian who cares deeply about those struggling to build their family in our state, I strongly urge you to support the infertility insurance bill, SB 1530, which will help Oregonians build their families when faced with cancer or other conditions that can cause infertility. Oregon families need your support now.

Dear [@legislatorTitle] [@legislatorLast],

As your constituent and Oregonian who cares deeply about those struggling to build their family in our state, I strongly urge you to support the infertility insurance bill, SB 1530, which will help Oregonians build their families when faced with cancer or other conditions that can cause infertility. Oregon families need your support now.

I need your support, along with the 1 in 8 couples in our state living with the disease of infertility and the thousands of Oregonians diagnosed with cancer during their reproductive years.

It is time for Oregon to update its insurance laws to include coverage for the standard of care for patients with infertility and those diagnosed with cancer or other conditions that may cause infertility. By passing this pro-family legislation, Oregon will join 19 other states across the nation that help hardworking families get access to medically necessary treatments while only minimally impacting insurance premiums, if at all. States with IVF insurance have lower rates of multiple births than states without IVF coverage, and lowering multiple births decreases overall health care costs and results in healthier babies and healthier moms.

Please support Oregon families by moving this pro-family bill forward. Thank you!

Sincerely,
Somer Foster

It is time for Oregon to update its insurance laws to include coverage for the standard of care for patients with infertility and those diagnosed with cancer or other conditions that may cause infertility. By passing this pro-family legislation, Oregon will join 19 other states across the nation that help hardworking families get access to medically necessary treatments while only minimally impacting insurance premiums, if at all. States with IVF insurance have lower rates of multiple births than states without IVF coverage, and lowering multiple births decreases overall health care costs and results in healthier babies and healthier moms.

Please support Oregon families by moving this pro-family bill forward. Thank you!

Sincerely,
Susan Fricke

Dear [@legislatorTitle] [@legislatorLast],

As your constituent and Oregonian who cares deeply about those struggling to build their family in our state, I strongly urge you to support the infertility insurance bill, SB 1530, which will help Oregonians build their families when faced with cancer or other conditions that can cause infertility. Oregon families need your support now.

I need your support, along with the 1 in 8 couples in our state living with the disease of infertility and the thousands of Oregonians diagnosed with cancer during their reproductive years.

Dear [@legislatorTitle] [@legislatorLast],

As your constituent and Oregonian who cares deeply about those struggling to build their family in our state, I strongly urge you to support the infertility insurance bill, SB 1530, which will help Oregonians build their families when faced with cancer or other conditions that can cause infertility. Oregon families need your support now.

I need your support, along with the 1 in 8 couples in our state living with the disease of infertility and the thousands of Oregonians diagnosed with cancer during their reproductive years.

It is time for Oregon to update its insurance laws to include coverage for the standard of care for patients with infertility and those diagnosed with cancer or other conditions that may cause infertility. By passing this pro-family legislation, Oregon will join 19 other states across the nation that help hardworking families get access to medically necessary treatments while only minimally impacting insurance premiums, if at all. States with IVF insurance have lower rates of multiple births than states without IVF coverage, and lowering multiple births decreases overall health care costs and results in healthier babies and healthier moms.

Please support Oregon families by moving this pro-family bill forward. Thank you!

Sincerely,
Stacy Rudy
10880 NE Skidmore St
Portland, OR 97220

By passing this pro-family legislation, Oregon will join 19 other states across the nation that help hardworking families get access to medically necessary treatments while only minimally impacting insurance premiums, if at all. States with IVF insurance have lower rates of multiple births than states without IVF coverage, and lowering multiple births decreases overall health care costs and results in healthier babies and healthier moms.

Please support Oregon families by moving this pro-family bill forward. Thank you!

Dear [@legislatorTitle] [@legislatorLast],

As your constituent and Oregonian who cares deeply about those struggling to build their family in our state, I strongly urge you to support the infertility insurance bill, SB 1530, which will help Oregonians build their families when faced with cancer or other conditions that can cause infertility. Oregon families need your support now.

I need your support, along with the 1 in 8 couples in our state living with the disease of infertility and the thousands of Oregonians diagnosed with cancer during their reproductive years.

It is time for Oregon to update its insurance laws to include coverage for the standard of care for patients with infertility and those diagnosed with cancer or other conditions that may cause infertility. By passing this pro-family legislation, Oregon will join 19 other states across the nation that help hardworking families get access to medically necessary treatments while only minimally impacting insurance premiums, if at all. States with IVF insurance have lower rates of multiple births than states without IVF coverage, and lowering multiple births decreases overall health care costs and results in healthier babies and healthier moms.

Please support Oregon families by moving this pro-family bill forward. Thank you!

As your constituent and Oregonian who cares deeply about those struggling to build their family in our state, I strongly urge you to support the infertility insurance bill, SB 1530, which will help Oregonians build their families when faced with cancer or other conditions that can cause infertility. Oregon families need your support now.

I need your support, along with the 1 in 8 couples in our state living with the disease of infertility and the thousands of Oregonians diagnosed with cancer during their reproductive years.

It is time for Oregon to update its insurance laws to include coverage for the standard of care for patients with infertility and those diagnosed with cancer or other conditions that may cause infertility. By passing this pro-family legislation, Oregon will join 19 other states across the nation that help hardworking families get access to medically necessary treatments while only minimally impacting insurance premiums, if at all. States with IVF insurance have lower rates of multiple births than states without IVF coverage, and lowering multiple births decreases overall health care costs and results in healthier babies and healthier moms.

Please support Oregon families by moving this pro-family bill forward. Thank you!

Sincerely,
Ashley Salvitti

By passing this pro-family legislation, Oregon will join 19 other states across the nation that help hardworking families get access to medically necessary treatments while only minimally impacting insurance premiums, if at all. States with IVF insurance have lower rates of multiple births than states without IVF coverage, and lowering multiple births decreases overall health care costs and results in healthier babies and healthier moms.

Please support Oregon families by moving this pro-family bill forward. Thank you!

Dear [@legislatorTitle] [@legislatorLast],

As your constituent and Oregonian who cares deeply about those struggling to build their family in our state, I strongly urge you to support the infertility insurance bill, SB 1530, which will help Oregonians build their families when faced with cancer or other conditions that can cause infertility. Oregon families need your support now.

I need your support, along with the 1 in 8 couples in our state living with the disease of infertility and the thousands of Oregonians diagnosed with cancer during their reproductive years.

It is time for Oregon to update its insurance laws to include coverage for the standard of care for patients with infertility and those diagnosed with cancer or other conditions that may cause infertility. By passing this pro-family legislation, Oregon will join 19 other states across the nation that help hardworking families get access to medically necessary treatments while only minimally impacting insurance premiums, if at all. States with IVF insurance have lower rates of multiple births than states without IVF coverage, and lowering multiple births decreases overall health care costs and results in healthier babies and healthier moms.

Please support Oregon families by moving this pro-family bill forward. Thank you!

As your constituent and Oregonian who cares deeply about those struggling to build their family in our state, I strongly urge you to support the infertility insurance bill, SB 1530, which will help Oregonians build their families when faced with cancer or other conditions that can cause infertility. Oregon families need your support now.

I need your support, along with the 1 in 8 couples in our state living with the disease of infertility and the thousands of Oregonians diagnosed with cancer during their reproductive years.

It is time for Oregon to update its insurance laws to include coverage for the standard of care for patients with infertility and those diagnosed with cancer or other conditions that may cause infertility. By passing this pro-family legislation, Oregon will join 19 other states across the nation that help hardworking families get access to medically necessary treatments while only minimally impacting insurance premiums, if at all. States with IVF insurance have lower rates of multiple births than states without IVF coverage, and lowering multiple births decreases overall health care costs and results in healthier babies and healthier moms.

Please support Oregon families by moving this pro-family bill forward. Thank you!

Sincerely,
Jason Fleming

It is time for Oregon to update its insurance laws to include coverage for the standard of care for patients with infertility and those diagnosed with cancer or other conditions that may cause infertility. By passing this pro-family legislation, Oregon will join 19 other states across the nation that help hardworking families get access to medically necessary treatments while only minimally impacting insurance premiums, if at all. States with IVF insurance have lower rates of multiple births than states without IVF coverage, and lowering multiple births decreases overall health care costs and results in healthier babies and healthier moms.

Please support Oregon families by moving this pro-family bill forward. Thank you!

Sincerely,
Erin Smith

Dear [@legislatorTitle] [@legislatorLast],

As your constituent and Oregonian who cares deeply about those struggling to build their family in our state, I strongly urge you to support the infertility insurance bill, SB 1530, which will help Oregonians build their families when faced with cancer or other conditions that can cause infertility. Oregon families need your support now.

I need your support, along with the 1 in 8 couples in our state living with the disease of infertility and the thousands of Oregonians diagnosed with cancer during their reproductive years.
