

Submitter: Ellen Miller

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2697

Having unsafe staffing on my unit has become normal. I dread going into work because we never have the staff for me to do my job to the standard that my patients deserve. I've been a nurse for 3 years but this is not what I thought nursing would be. The pace that is expected of me at work is unsustainable, and even having been a nurse for a short amount of time I'm considering leaving.
