

Submitter: Shayne Peltier

On Behalf Of:

Committee: Senate Committee On Judiciary

Measure: SB422

During my time living in California and riding a motorcycle, I participated in lane sharing on a daily basis during my commute. Lane sharing allows a rider to be in control of one more potentially life saving variable, by limiting the chances of a fatal rear-end. In my experience riding a motorcycle and driving a car, drivers aren't looking out for motorcycles on the road- You become accustomed to looking out for a car, and 2 tail lights, not a small motorcycle.
