

Submitter: Leslie McKenna

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2697

As a healthcare worker of twenty+ years, I fully support HB 2697. Short staffing models are not new. They have been this way for many years, increasingly becoming worse, with no accountability for the organizations that compromise patient care/well-being and causing burn out of our valuable resources: the healthcare worker. From bedside Nursing to other healthcare workers such as Imaging, Surgical Services, Cardiac Care, Rehab, Laboratory, Respiratory, Pharmacy, among other vital professions who support patient care and well-being. Do better for the people of Oregon!
