

I am Deian Salazar,

I am testifying in favor of SB 610 for a few simple reasons.

We are already educating the people this legislation vouches for in schools, and I feel food is a human right. Nobody should have to struggle for the basic needs to survive, we created civilization specifically for the purpose of providing for everyone. It would be a slap in the face to our ancestors, to the underprivileged, to people of color and neurodiverse individuals like myself.

Undocumented Immigrants typically only overstay their green cards but pay taxes like the rest of us, and we are built on no taxation without representation, and they contribute to the economy, and we need to fight exploitation of them which hurts both them and our citizen workers by providing citizenship and giving them a hand up, such as what this bill provides.

This is a common sense solution that is among the most core values of America, and of society as a whole.

I urge you for common decency, to vote yes, to reach the society humanity has always fought for, across religion, ethnicity, and all of time.

Thank you.
