

Submitter: Megan Lehman

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB3

It's a complete shock that this type of education isn't already mandatory for graduating seniors. All students will benefit from this type of coursework regardless of their race, socioeconomic status, and upbringing. Students need exposure to personal finances, resume building, budgeting, college application completion, etc. from our education system as each of them must navigate these complex topics following graduation (many are AI reading trying to navigate these topics prior to graduating). Please pass this bill to further support our youth. They will be the ones caring for us in the near future and they deserve the best chance possible of success.
