

Submitter: Mark White

On Behalf Of:

Committee: Senate Committee On Judiciary

Measure: SB422

Sirs and Madams, please pass this measure. Lane filtering is not only safer, (see the definitive motorcycle safety research by Professor Harry Hurt) but lane filtering is effective in reducing traffic congestion and is more energy efficient. Lane filtering has proven itself not only in California but is standard practice the world over. I've ridden in countries (and California) all over the world, it works well everywhere! It will require an public education campaign by ODOT.
