

Submitter: Brett Ramsey
On Behalf Of:
Committee: Senate Committee On Judiciary
Measure: SB422

A large portion of rider accidents and fatalities are due to riders getting hit from behind. Not only does this give riders an escape but also raises awareness. Once passed in California motorcycle accident reduced because people were more aware of riders in daily life. However, this is not only a safety issue but a traffic one as well. Pro motorcycle laws and protections encourage not only more people to ride but to ride safely. More motorcycles on the road means less traffic and shorter commute times for everyone.
