and World Affairs

Measure: SB776

No to reparations for black people. I thought Affirmative Action, going on for decades, was already reparations. Once given there is no end to the desire for more. Big can of worms.

Now, if you want to give reparations, give them to all the people Governor Brown hurt during the COVID crime against humanity. People lost their jobs, businesses and were coerced, bribed and shamed for not allowing the injection of an experimental gene therapy masquerading as a vaccine. That is something all Democrats supported and was hideous.

And if you want to go further with reparations then included all women who have been discriminated against for eons.
