

Submitter: Jaqueline Kunz

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure: HB3056

Oregon has dealt with extreme high temperatures. In the past, AC units were rarely needed by residents in Western Oregon. We live in a different reality, in a climate crisis that requires response and solutions. Heat pumps are a low cost, lower waste alternative and every Oregonian deserves to access. There needs to be funding for opportunities that invest back into the community and how they can respond to extreme weather patterns. I support this bill.
