

If SB 603 goes into affect those that can leave this state will and take their tax dollars with them. What then? Raise the tax to cover the loss of revenue? The working citizens of this state are tired of being punished by paying for those who refuse to work, get off of drugs, or positively impact to our society. We are tired of loosing businesses, jobs, our beautiful cities because we keep handing our hard earned money to those that do nothing but destroy our neighborhoods. And it's all because of your insane way of thinking that if you keep taking from those that are supporting this state and giving to those that do nothing it will somehow fix them. This is a whole new level of co-dependency.
