

Submitter: Caitlyn Robb

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB3

Our students and education system can certainly benefit from a course that will offer practical skills that students can carry with them for life. Many skills such as writing resumes, CVs, or cover letters are not taught consistently in schools. Some students have the advantage of learning these skills from family or community members, but those who do not have access to the same kind of support from their families, peers or community are at a disadvantage. Please make it a requirement for high school students to complete a 1 credit course on future planning, in order to better prepare students for current and post-high school challenges.
