

Submitter: William Logue
On Behalf Of:
Committee: Senate Committee On Judiciary
Measure: SB422

I am a motorcycle rider of 35 years and aware of many dangers especially on freeways. When freeways become a backup or stand still motorists make bad decisions when trying to move where possible and never seeing the the bikes. When sitting or stopped on a freeway sitting on an air cooled bike the bike acts up and the heat from the sun and bike, bakes a rider and dehydrates the rider. Must keep the rider moving for safety and health. Thank you
