

Submitter: Julie Sonam

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB488

Please take action for clean air for all. I can not believe we even have to submit testimony and have legislation to make this stop. We have to do the right thing. There are better ways. This system is out dated. It's time to choose health and well being over doing what is easy. Please choose clean air. I am counting on you.
