

Submitter: David Terrell
On Behalf Of:
Committee: Senate Committee On Judiciary
Measure: SB422

My name is David Terrell and resident of Portland Oregon since 1997. I'm a motorcyclist writing in support of SB422! If approved this bill will make it safer for motorcyclist in heavy freeway traffic, reduced congestion as the space taken by a motorcycle will be reduced, and will be better for the environment as congestion is reduced. Personally, I have experienced unsafe conditions when trapped in heavy traffic, more so when a big rig is behind me and the driver of the truck is trying to reduce the space between him and the can in front of him/her, and the motorcycle is in between. If I was able to share the lane with the car sitting in front of me I would be protected. Please pass this bill!
