

Submitter: Michael Winklepleck
On Behalf Of: City Of Brownsville
Committee: Senate Committee On Energy and Environment
Measure: SB803

This rush to force the industries that plant and harvest our food, ship our goods, build and support our infrastructure etc. to a renewable diesel without a real viable plan is not in the best interest of our citizens. This rush would only serve to risk many of our citizens livelihoods based on the aforementioned items. Why put our citizens at risk without doing the real work of developing a viable plan that includes voices from every area of industry giving input? Everything in your office, home, fridge, garage was transported via Diesel. I strongly oppose this bill in it's current form and I urge you to do the same.

Mike Winklepleck
