Measure: SB803

Submitted by: Matt Foster Farmer/Rancher in Deschutes county

Committee: Senate Committee On Energy and Environment

Measure: SB 803

I strongly OPPOSE measure SB 803, measure sb 803 shows a complete disregard for hard working Oregonians. In a time when inflation is hurting small businesses and families in Oregon this bill aims to increase costs on just about everything Oregonians produce and consume.

If the goal is to move to a renewable diesel type fuel with limited supply, we should allow the free market to decide for themselves if this is a viable option.

No on SB 803
