On Behalf
Of:

Committee: Joint Committee On Ways and Means Subcommittee On
Transportation and Economic Development

Measure: SB5511

I support passage of this bill. My wife and I own a duplex that we rent. The income we receive from this rental supports our monthly personal needs and we anticipate needing this income in the future. I believe this bill will help our renters maintain their ability rent, and will therefore help small renters like myself be successful and a positive part of the economy.

Also I support this bill to put public money into housing. As a retired architect and who worked on many multifamily housing projects, I ask why has private investment in housing over recent years not produced enough housing? It seems either because it won't or it can't. I will be glad to pay taxes to support this bill which will boost our economy and endorse a message from the state of Oregon that we are generous, that we want to help all our fellow citizens.
