

Submitter: Marilyn OMalley

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

For the welfare of Oregon residents, the future of our children, and humane treatment of animals, I urge a moratorium on factory farms in our state. Practices by factory farms are unhealthy for humans, for the environment, and cruel for the animals involved. We don't need more toxic sprays. We don't need methane clouds forming over the livestock kept in unnatural, crowded conditions. We don't need more small farmers pushed out of business. There is evidence that small farms are better for the environment. Do not allow more factory farms .
